Lê Hoàng Huy

Unity Developer

Dob: 11/06/2001

Gender: Male

Phone: 08 68 78 1600

Email: lehoanghuy11062001@gmail.com

Website: https://benkstudio.com/

Portfolio: https://bna-devgame.netlify.app/

Github: https://github.com/LeHoangHuy1106

Address: District 7, Ho Chi Minh City

OBJECTIVE

Game Developer with a strong problem-solving mindset and a focus on building efficient, scalable solutions. Experienced in analyzing gameplay systems, identifying bottlenecks, and optimizing performance for both mobile and web platforms. Actively leverage AI tools to accelerate development, reduce costs, and improve productivity across the entire game production pipeline. Seeking to contribute to impactful game projects while continuously improving technical and product-oriented thinking.

EDUCATION

2019 - 2023

TON DUC THANG university

Software Engineering

GPA : 7.85/10

WORK EXPERIENCE

2/2023 - 8/2023

Unity Developer

OneChain Studio

- Participated in the development of various mini-games on the Unity platform, targeting both mobile and web releases.
- Implemented core gameplay mechanics, UI systems, animations, and level design.
- Performed optimization and debugging to ensure smooth performance across multiple devices.
- Integrated player behavior tracking using tools like Firebase Analytics to support data-driven improvements.
- Took ownership of assigned features and tasks, delivering them independently while also actively collaborating with game designers, artists, and testers.
-

Notable Projects

- ***Roll Puzzle:*** https://play.google.com/store/apps/details?id=game.onechain.rollpuzzle
- ***Sorting Time:*** https://play.google.com/store/apps/details?id=com.little.left.ds
- ***Dog Cat Battle:*** https://play.google.com/store/apps/details?id=com.onechain.pawsandclaws
- ***Emoji Guess:*** https://app.saworld.io/game/Emoji-Guess-374003/play

8/2023 - 4/2024

Cocos Creator Developer

OneChain Studio

- Developed multiple web-based games on the app.saworld.io platform using Cocos Creator (TypeScript), focusing on performance optimization and delivering smooth user experience.
- Built core gameplay systems, scene transitions, UI interfaces, animations, and reusable components based on project requirements.
- Optimized game performance in terms of frame rate, memory management, and asset loading.
- Collaborated with backend developers to integrate RESTful APIs, including leaderboard, user login, game progress saving, and multiplayer functionalities.

- Maintained clean, modular code and used Git for version control across team projects.

Notable Projects

- ***Dumpling Jumpling:*** https://byvn.net/kGkJ
- ***Zombie Hunter:*** https://byvn.net/hAnQ
- ***Golden Thief:*** https://byvn.net/XoVE

4/2024 - now

Freelance Developer

Self-Employed

- Worked directly with clients to gather requirements, define project scope, and deliver tailored game solutions using Unity and Cocos Creator.
- Designed and developed web and mobile games from scratch, focusing on gameplay systems, UI, and cross-platform performance.
- Took ownership of the technical implementation, including game logic, asset integration, and basic backend/API connections.
- Led a small remote team (2–4 members), assigning tasks, tracking progress, and maintaining efficient workflows using tools like Trello and Notion.
- Collaborated closely with clients throughout development, providing regular updates, demos, and incorporating feedback to ensure alignment and satisfaction.
- Optimized performance, scalability, and development workflows to ensure timely delivery of high-quality game prototypes and final products.
- Leveraged AI tools to accelerate development, reduce production costs, and improve team productivity.
- Proactively identified and resolved technical and project-related challenges during development.

Notable Projects

- ***Duck Race (Cocos creator):*** https://byvn.net/n6lY
- ***Racing Lengends 3d (Cocos creator):*** https://byvn.net/HQFw
- ***Wave Monster (Unity):*** https://byvn.net/2o3S
- ***Idle Mechanics Manager (Unity):*** https://byvn.net/fHVS
- ***Capybara Merge (Unity):*** https://byvn.net/eVYX

SKILLS

Experience using Unity (C#) to develop 2D and 3D games for mobile and web platforms, including gameplay, UI, animation, scene management, and performance optimization.
Familiar with concepts such as object-oriented programming (OOP), data structures, algorithms, and common design patterns used in game development.
Worked with components like Prefab and Animator; integrated Firebase, Unity Ads, user tracking systems, RESTful APIs, and basic multiplayer features.
Comfortable with tools like Git and ChatGPT for version control, debugging, and improving workflow.
Used Cocos Creator (TypeScript) and have a basic understanding of ReactJS and Node.js when collaborating with backend teams.
Able to communicate effectively, work well in teams as well as independently, and read technical documentation in English.

CERTIFICATION

2023 PTIS Advanced Certificate (147/200)
